Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

I use my tracfone prepaid mobile to call my home so that I can be rescued from wherever I might be, if say the bus breaks down, or if I just don't fell like walking from Spanish Fork UTAH to Payson UTAH (It takes 3 hours on the road that is the 822 U.T.A. bus route) I am at a point where I can barely afford to buy \$5.00 in candy (my primary food supply). When I was 16 years old, I had to buy some of my own food that meant that I spent \$60.00 A week on candy bars, fast food, and soda pop. I forgot to buy toothpaste, floss, and a toothbrush. That caused me to need 11 fillings a crown on a root canaled tooth and extract a tooth that was too far gone to fix. please don't take away my emergency phone line!! Keep the USF Fair!

Sincerely,

Justin Rayl
